- **Project I did: Built a pinhole projector to view eclipse**
- **Library program I attended: Crafty Science**
- **Other activity: Built a space ship out of Legos**
- **Other activity: _____**

For Parents:

You are the biggest influence on preventing summer learning loss (or Summer Slide) in your child. Here are five tips to keep them motivated over the summer:

- Visit the library regularly
- Start or continue a set reading time from the school year
- Let your child read and learn about their interests
- Include reading and writing when you do family activities such as cooking, travel, and game nights
- Set a family goal for reading or learning over the summer and work together to meet it
